CONTENTS

ВВЕДЕНИЕ	5
1. FROM THE HISTORY OF COMPUTER SCIENCE ..	6
1.1. Early history	6
1.2. First computers of the 20th century.....	8
1.3. First Soviet computers.....	12
2. INFORMATICS	13
2.1. The origins of “informatics”.....	13
2.2. Description informatics concepts.....	14
2.3. Areas of computer science	15
2.4. Major informatics achievements	20
3. INFORMATION	22
3.1. Information theory.....	22
3.2. Encoding information.....	24
3.3. Encoding numbers.....	25
3.4. Character encoding.....	29
3.5. Encoding multimedia	33
4. ALGORITHMS	38
4.1. Basic Terms.....	38
4.2. An example of algorithm.....	42
4.3. Emil Post and Alan Turing.....	44
5. PROGRAM DESIGN AND COMPUTER LANGUAGES.....	46
5.1. Main definitions	46
5.2. Brief history of the programming languages.....	48
5.3. Classification of programming languages according to programming styles	51
6. LOGIC BASICS OF A COMPUTER	54
6.1. Classical logic.....	54
6.2. Propositional Logic	55
6.3. Boolean Algebra/Logic	55
6.4. Logic gates	60
7. COMPUTER ARCHITECTURE	68
7.1. Basic terms	68
7.2. Von Neumann architecture.....	69
7.3. Modified Harvard architecture	70

8. HARDWARE	72
8.1. CPU	72
8.2. Buses and cards	73
8.3. Computer memory	76
8.4. Input/output devices	99
9. SOFTWARE	133
9.1. General information.	133
9.2. Operating Systems	135
10. DATABASE	138
10.1. Basic terms	138
10.2. History	139
11. NETWORKS	145
11.1. General information about networks	145
11.2. History	146
11.3. Classification of network	149
11.4. Basic hardware components	162
12. WEB DESIGN	165
12.1. Evolution of web design	165
12.2. Technologies and techniques	168
13. HTML	173
13.1. Markup Languages	173
13.2. Some historical facts	173
13.3. HTML tags and attributes	174
14. INTERNET SECURITY	185
14.1. Malicious software	185
14.2. Classification	188
14.3. Vulnerability and countermeasures	192
15. E-LEARNING	194
15.1. Overview	194
15.2. History	195
15.3. Educational approach	196
15.4. Advantages and disadvantages	198
Bibliography	200
