TIMELY SOLUTIONS

- Learn how networks operate by examining the physical and data-link layers of the OSI model
- Discover how different network architectures such as Ethernet, Fast Ethernet, FDDI, and Token Ring operate
- Explore the technologies that make wireless connections possible
- Use this guide to enter the world of distributed computing

HIGHLIGHT

Networking Essentials Unleashed is the reference you need to learn the fundamental networking concepts required by today's IT professional.

With the design of *Networking Essentials Unleashed* you'll start assembling your networking knowledge from the ground up and then build from layer to layer you know networks and how to make them work for you.

Introduction xxiii

Part I Network Fundamentals

| | |
|---------------------------------------|-----------|
| 1 A Networking Primer | 3 |
| Evolution of Networks | 4 |
| Standards Organizations | 6 |
| ANSI | 6 |
| IEEE | 7 |
| The ISO | 7 |
| The IEC | 7 |
| IAB | 7 |
| The OSI Reference Model | 8 |
| Layer 1: The Physical Layer | 9 |
| Layer 2: The Data Link Layer | 10 |
| Layer 3: The Network Layer | 11 |
| Layer 4: The Transport Layer | 11 |
| Layer 5: The Session Layer | 12 |
| Layer 6: The Presentation Layer | 12 |
| Layer 7: The Application Layer | 12 |
| The Model's Usage | 12 |
| Networking Basics | 14 |
| Hardware Components | 15 |
| Software Components | 17 |
| Making Networks from Components | 18 |
| Summary | 22 |
| 2 LAN Types and Topologies | 23 |
| LAN-Attached Devices | 24 |
| Types of Servers | 24 |
| Network Type | 28 |
| Peer-to-Peer Networks | 28 |
| Server-Based Networks | 31 |
| Combination Networks | 33 |
| LAN Topologies | 33 |
| Bus Topology | 34 |
| Ring Topology | 35 |
| Star Topology | 37 |
| Switched Topology | 38 |
| Complex Topologies | 39 |
| Daisy Chains | 39 |
| Hierarchies | 40 |

| | |
|---|-----------|
| LAN Functional Areas | 43 |
| Station Connectivity | 43 |
| Server Connectivity | 44 |
| WAN Connectivity | 44 |
| Backbone Connectivity | 45 |
| Summary | 50 |
| 3 The Physical Layer | 51 |
| Layer 1: The Physical Layer | 52 |
| Physical Layer Functions | 53 |
| Distance Implications | 58 |
| Physical Transmission Media | 61 |
| Coaxial Cable | 61 |
| Twisted Pair Wire | 63 |
| Fiber Optic Cable | 68 |
| Summary | 72 |
| 4 The "Not-so-Physical" Physical Layer | 73 |
| The Electromagnetic Spectrum | 74 |
| Spectral Characteristics | 76 |
| Bandwidth and the Spectrum | 77 |
| What Does This Mean? | 78 |
| Wireless LANs | 79 |
| Wireless Station Connectivity | 79 |
| Wireless Peer-to-Peer Connectivity | 80 |
| Wireless Hub Interconnection | 80 |
| Wireless Bridges | 81 |
| Transmission Technologies | 82 |
| Spread Spectrum Radio Frequency | 82 |
| Single Band Radio Frequency | 87 |
| Infrared | 88 |
| LASER | 89 |
| The IEEE 802.11 | 90 |
| Media Access | 91 |
| Physical Layers | 91 |
| Summary | 92 |
| 5 The Data Link Layer | 95 |
| OSI Layer 2 | 96 |
| Frames | 97 |
| Typical Frame Components | 97 |
| Frame Summary | 99 |
| Evolution of Proprietary Frame Structures | 99 |
| Xerox's PARC Ethernet Frame | 99 |
| DIX Ethernet Frame | 100 |

| | |
|--|------------|
| IEEE Project 802 | 102 |
| IEEE 802.2 Logical Link Control (LLC) | 103 |
| IEEE 802.2 Sub-Network Access Protocol (SNAP) | 105 |
| IEEE 802.3 Ethernet Frame | 106 |
| IEEE 802.5 Token Ring | 110 |
| FDDI | 111 |
| Concept of Media Access Control | 114 |
| Contention-Based Media Access | 114 |
| Demand Priority Media Access | 115 |
| Token-Based Media Access | 116 |
| Selecting a LAN Technology | 117 |
| 802.3 Ethernet | 118 |
| 802.5 Token Ring | 118 |
| FDDI | 118 |
| 802.12 VG-AnyLAN | 118 |
| Summary | 119 |
| 6 The Mechanics of Media Access | 121 |
| Media Access | 122 |
| Contention-Based Media Access | 122 |
| Token-Based Media Access | 128 |
| Demand-Priority Media Access | 131 |
| Accessing Media in a Switched LAN | 132 |
| Summary | 134 |
| Part II Building Local Area Networks | |
| 7 Ethernet | 137 |
| The Various Ethernets | 138 |
| Supported Hardware | 140 |
| Layered Functions | 142 |
| Data Link Layer Functions | 142 |
| Physical Layer Functions | 144 |
| The Physical Layer's Medium Dependent Interfaces | 146 |
| 10Base2 | 147 |
| 10Base5 | 147 |
| 10BaseT | 147 |
| 10BaseFL | 151 |
| 10BaseFOIRL | 151 |
| Mixing Media Types | 152 |
| IEEE 802.3 Ethernet Frame | 152 |
| Delay Budgets | 157 |
| Estimates of Propagation Delays | 157 |
| Calculating Delay Budgets | 158 |
| Summary | 158 |

| | | |
|-----------|--|------------|
| 8 | Faster Ethernets | 159 |
| | Fast Ethernet | 160 |
| | Fast Ethernet's Media Choices | 161 |
| | 100BaseTX | 162 |
| | 100BaseFX | 162 |
| | 100BaseT4 | 163 |
| | Signaling Schemes | 163 |
| | Maximum Network Diameter | 165 |
| | Fast Ethernet Summary | 165 |
| | Gigabit Ethernet | 165 |
| | The Physical Interfaces | 166 |
| | What Else Is New? | 169 |
| | Too Good to Be True? | 171 |
| | Summary | 171 |
| 9 | Token Ring | 173 |
| | Overview | 174 |
| | Standardization of Token Ring | 175 |
| | Token Ring Frame Structures | 176 |
| | The Token Frame | 176 |
| | The Data Frame | 178 |
| | The Fill Sequence | 180 |
| | Understanding Token Ring | 181 |
| | The Hardware | 182 |
| | Topology | 184 |
| | Dynamic Ring Membership | 185 |
| | The Active Monitor | 187 |
| | What's Ahead for Token Ring? | 188 |
| | Switching and Dedicated Token Ring | 188 |
| | Increasing the Transmission Speed | 189 |
| | Will It Work? | 190 |
| | Summary | 191 |
| | Benefits of Token Ring | 191 |
| | Limitations of Token Ring | 192 |
| 10 | FDDI | 193 |
| | FDDI | 194 |
| | The Functional Components | 195 |
| | Building FDDI Networks | 197 |
| | Port Types and Attachment Methods | 197 |
| | Valid Connections | 199 |
| | Topologies and Implementations | 200 |
| | Network Size | 206 |

| | |
|--|------------|
| FDDI Frames | 207 |
| Data Frame | 207 |
| LLC Data Frame | 209 |
| LLC SNAP Data Frame | 210 |
| The Token Frame | 211 |
| SMT Frames | 212 |
| The Mechanics of FDDI | 212 |
| Station Initialization | 212 |
| Ring Initialization | 214 |
| Summary | 214 |
| 11 ATM | 215 |
| The Fundamentals of ATM | 216 |
| Virtual Connections | 217 |
| Connection Types | 217 |
| Transmission Rates | 218 |
| Topology | 219 |
| ATM Interfaces | 220 |
| ATM Reference Model | 221 |
| Physical Layer | 222 |
| ATM Adaptation Layer | 223 |
| The ATM Layer | 228 |
| The Cell | 229 |
| Local Area Network Emulation (LANE) | 232 |
| Summary | 234 |
| 12 Network Protocols | 235 |
| Protocol Stacks | 236 |
| The Internet Protocol, Version 4 (IPv4) | 238 |
| Dissecting TCP/IP | 238 |
| The Internet Protocol, Version 6 (IPv6) | 245 |
| IPv6 Unicast Address Structures | 246 |
| IPv6 Transitional Unicast Address Structures | 247 |
| IPv6 Anycast Address Structures | 248 |
| IPv6 Multicast Address Structures | 249 |
| IPv6 Conclusion | 249 |
| Novell's IPX/SPX | 249 |
| Dissecting IPX/SPX | 249 |
| Data Link and Medium Access Layers | 253 |
| IPX Addressing | 253 |
| IPX/SPX Conclusion | 254 |
| Apple Corporation's AppleTalk Protocol Suite | 255 |
| Dissecting AppleTalk | 255 |

| | |
|--------------------------|-----|
| NetBEUI..... | 260 |
| NetBEUI Conclusion | 261 |
| Summary..... | 261 |

Part III Building Wide Area Networks

| | |
|--|------------|
| 13 Wide Area Networking | 265 |
| Understanding WAN Technologies | 266 |
| Using Transmission Facilities | 267 |
| Circuit Switched Facilities | 267 |
| Packet Switched Facilities | 269 |
| Cell-Switched Facilities | 272 |
| Choosing Communications Hardware | 272 |
| Customer-Provided Equipment (CPE) | 273 |
| Premises Edge Vehicles | 274 |
| Understanding Internetwork Addressing | 275 |
| Ensuring Unique Addressing | 275 |
| Internetworking with Different Protocols | 276 |
| Using Routing Protocols | 277 |
| Distance-Vector Routing | 278 |
| Link-State Routing | 278 |
| Hybridized Routing..... | 279 |
| Static Routing..... | 279 |
| Selecting a Protocol | 280 |
| Understanding WAN Topologies | 280 |
| Peer-to-Peer Topology | 281 |
| Ring Topology | 282 |
| Star Network Topology | 283 |
| Full Mesh Topology | 285 |
| Partial Mesh Topology | 286 |
| Two-Tiered Topology | 286 |
| Three-Tiered Topology | 288 |
| Hybrid Topologies | 289 |
| Designing Your WAN | 290 |
| WAN Performance Criteria | 290 |
| Costs of the WAN | 294 |
| Summary..... | 295 |
| 14 Leased Lines | 297 |
| Overview of Leased Lines | 298 |
| Multiplexing Techniques | 298 |
| Benefits and Drawbacks of Leased Lines | 300 |
| Topology of Leased Lines | 301 |

| | |
|--|------------|
| Digital Signal Standards | 304 |
| ANSI's Digital Signal Hierarchy | 304 |
| ITU's Digital Signal Hierarchy | 306 |
| SONET's Carrier Systems | 307 |
| The T-Carrier System | 308 |
| T-Carrier Services | 309 |
| Line Encoding | 310 |
| Framing Formats | 312 |
| Summary | 313 |
| 15 Circuit Switched Transmission Facilities | 315 |
| Switched 56 | 316 |
| Common Uses for Switched 56 | 316 |
| Switched 56 Technologies | 317 |
| Frame Relay | 317 |
| Frame Relay Versus Leased Lines | 318 |
| Extended Frame Relay | 321 |
| Permanent Virtual Circuits Versus Switched Virtual Circuits .. | 321 |
| The Format of Basic Frame Relay | 321 |
| Designing Frame Relay Networks | 322 |
| UNI Versus NNI | 323 |
| Going Above the CIR | 323 |
| Flow Control in the Frame Relay Network | 325 |
| Voiceover Frame Relay (VoFR) | 325 |
| Private, Public and Hybrid Networks | 326 |
| Internetworking with ATM | 328 |
| ATM | 329 |
| History of ATM | 330 |
| The Nitty-Gritty of ATM | 331 |
| VPIs and VCIs | 335 |
| ATM Connections | 335 |
| Quality of Service | 336 |
| Signaling | 336 |
| Provisioning ATM Circuits | 337 |
| Interoperating with LANE | 337 |
| Migrating to ATM | 338 |
| Summary | 338 |
| 16 Packet Switched Transmission Facilities | 339 |
| X.25 | 340 |
| The History of X.25 | 341 |
| Pros and Cons of X.25 | 341 |
| Common Uses | 341 |
| Comparison to OSI Reference Model | 341 |

| | | |
|-----------|--|------------|
| | Different Types of Networks | 345 |
| | X.25 Specifications (RFC 1356) | 346 |
| | Migrating from X.25 | 347 |
| | Summary | 348 |
| 17 | Modems and Dial-Up Technologies | 349 |
| | How Modems Work | 350 |
| | Bits and Bauds | 352 |
| | Modem Modulation Types | 353 |
| | Asynchronous and Synchronous | 355 |
| | Standard Modem Interfaces | 357 |
| | ITU-T (CCITT) Modem Standards | 359 |
| | Modems and Microsoft Networking | 361 |
| | Summary | 363 |
| 18 | Remote Access Services (RAS) | 365 |
| | The History of Remote Access Networking | 366 |
| | The 1970s | 367 |
| | The 1980s | 367 |
| | The Craze of the 90s | 368 |
| | Establishing Remote Connections | 368 |
| | Developing Protocol Standards | 369 |
| | The AT Command Set | 370 |
| | RAS Connection Protocols | 371 |
| | Establishing a Session | 371 |
| | TCP/IP Access Protocols | 371 |
| | Remote Access Transport Services | 374 |
| | How RAS Users Are Currently Connecting | 374 |
| | Windows NT RAS Capabilities | 381 |
| | Using RAS as an Internet Gateway/Router for a LAN | 381 |
| | Using RAS to Provide Internet Access for Dial-In Users | 383 |
| | Novell NetWare Connect Software's RAS Capabilities | 385 |
| | Banyan Systems' RAS Capabilities | 385 |
| | RAS Security Issues | 386 |
| | Passwords | 387 |
| | Dialers | 387 |
| | Callback Systems | 388 |
| | Summary | 388 |
| 19 | Intranets and Extranets | 389 |
| | Intranets | 390 |
| | What's So Special About the Web? | 391 |
| | What About Intranets? | 392 |

| | |
|---|-----|
| Extranets | 394 |
| The Trouble with Open Protocols | 394 |
| The Trouble with Connectionless Protocols | 395 |
| The Trouble with Open Protocols and Extranets | 398 |
| Rules for Securing an Extranet | 399 |
| Am I Wasting My Time? | 401 |
| Virtual Private Networks | 401 |
| Carrier-Provided VPNs | 402 |
| Tunneling..... | 403 |
| Summary | 404 |

Part IV Operating Networks

| | |
|--|------------|
| 20 Network Operating Systems (NOS) | 407 |
| History of Network Operating Systems (NOS) | 408 |
| Novell Dominates the Market | 408 |
| New Players Emerge | 409 |
| Microsoft Takes Hold..... | 409 |
| What's Happening Now | 410 |
| Traditional Services of a NOS | 410 |
| Banyan Network Systems | 412 |
| Services and Applications of VINES | 412 |
| VINES-Supported Standards | 413 |
| Strengths and Weaknesses of VINES | 414 |
| Novell NetWare | 414 |
| Features of NetWare | 415 |
| NetWare-Supported Standards | 418 |
| Strengths and Weaknesses of NetWare | 419 |
| Microsoft Windows NT | 419 |
| Features of Windows NT | 420 |
| Windows NT-Supported Standards | 422 |
| Windows NT Security | 423 |
| Strengths and Weaknesses of Windows NT | 423 |
| Summary | 424 |
| 21 Network Administration | 425 |
| What Is Network Administration? | 426 |
| Managing Network Accounts | 427 |
| User Accounts | 427 |
| Group Accounts | 431 |
| Multiple Logins | 434 |
| Managing Resources | 434 |
| Hardware Resources | 434 |
| Disk Quota | 434 |

- Files & Directories 435
- Software Installation/Upgrades 435
- Network Printing 436
- Management Tools 437
 - Microsoft Management Tools 438
 - Zero Administration 440
 - Microsoft Management Console 440
- Summary 440
- 22 Managing Network 441**
 - Potential Network Performance Problems 442
 - Physical Layer Issues 442
 - Network Traffic Issues 444
 - Address Resolution Problems 446
 - Internetworking Issues 447
 - Tools and Techniques 447
 - Ping 447
 - Traceroute 449
 - Windows NT Performance Monitor 450
 - Network Analyzers 451
 - Hardware Troubleshooting 452
 - Summary 454
- 23 Data Security 455**
 - Planning for Network and Data Security 456
 - Levels of Security 456
 - Security Policies 457
 - Workgroups, Domains, and Trusts 460
 - The Four Domain Models 462
 - Setting up Security in Windows 95 465
 - Password-Protected Shares 465
 - Setting up Security in Windows NT 467
 - C2 Compliance 470
 - Auditing 471
 - Diskless Workstations 472
 - Encryption 472
 - Virus Shields 473
 - Summary 474
- 24 Data Integrity 475**
 - Protecting the Operating System 477
 - Installation Procedures 478
 - Maintenance Techniques 480
