INFORMATION TECHNOLOGIES IN EDUCATION

учебно-методическое пособие

Петропавловск
2013

CONTENTS

Introduction.....3

1. Course of lectures.....8
Lecture 1. Theme: Information Technologies in Education: Opportunities and Challenges 8
Lecture 2. Theme: Instructional systems. Training systems. Knowledge-based monitoring systems. Computer testing technologies 13
Lecture 3. Theme: Innovative technologies of teaching and control in the conditions of education informatization.....19
Lecture 4. Theme: Computer control and computer-based testing....22
Lecture 5. Theme: Theoretical bases of computer teaching and control technology.....24
Lecture 6. Theme: Multimedia technologies in education.....27
Lecture 7. Theme: Distance learning technologies 29
Lecture 8. Theme: Didactic principles of the use of computer teaching aids.....31
Lecture 9. Theme: Pedagogical communication technologies in the conditions of educational informatization 34
Lecture 10. Theme: Ethical problems of communication and teaching in the computer-based environment.....37
Lecture 11. Theme: Types of information and educational environments.....41
Lecture 12. Theme: Formation and development of unified information and educational environment (UIEE).....43
Lecture 13. Theme: Videoconferencing system is the prospects of UIEE development.....46
Lectures 14-15. Theme: Education web portal. Electronic Rectorate.....48

2. Course of lab works.....56
Lab Work 1. Distance learning technologies. Acquaintance with distance learning system "Prometheus".....56
Lab Work 2. Knowledge-based monitoring systems used at NKSU.63

Lab Work 3. Methodology of computer-based communication mechanisms application.....67
Lab Work 4. Use of communication technologies in education.....73
Lab Work 5. Work with Education Web Portal.....76
Lab Work 6. Work with modules of Electronic Rectorate.....78
Lab Work 7. Development of computer tests.....82

3. Materials for independent postgraduate's work.....83
IPW 1. Problems associated with Information Technologies adaptability in the system of education.....83
IPW 2. Possibilities of use of computer-based teaching technology.84
IPW 3. Psychological and pedagogical possibilities of computer-based teaching aids.....87
IPW 4. Use of communication technologies in education.....89
IPW 5. Work with modules of Electronic Rectorate.....92
IPW 6. Develop a computer test on 10 modules of Electronic Rectorate.....94

4. Materials for the control and estimation of postgraduate's educational achievements.....98
